

Reedley Primary School

Intimate Care Policy

Our school nurtures curiosity and creativity through an inspiring, broad and engaging curriculum, where learning is at the heart of all that we do. Children at Reedley learn to become resilient and self-assured in a safe environment where challenge is key. Team Reedley are encouraged to thrive and achieve as individuals, preparing them for their role as caring and active citizens in modern Britain.

(Mission statement)

1) Principles

- 1.1 The Governing Body will act in accordance with Section 175 of the Education Act 2002 and the Government guidance 'Safeguarding Children and Safer Recruitment in Education' to safeguard and promote the welfare of pupils¹ at this school.
- 1.2 This school takes seriously its responsibility to safeguard and promote the welfare of the children and young people in its care. Meeting a pupil's intimate care needs is one aspect of safeguarding.
- 1.3 The Governing Body recognises its duties and responsibilities in relation to the Equalities Act which requires that any pupil with an impairment that affects his/her ability to carry out day-to-day activities must not be discriminated against.
- 1.4 This intimate care policy should be read in conjunction with the schools' policies as below (or similarly named):
 - ☐ safeguarding policy and child protection procedures
 - ☐ staff code of conduct and guidance on safer working practice
 - ☐ 'whistle-blowing' and allegations management policies
 - ☐ health and safety policy and procedures
 - ☐ Special Educational Needs policy
- 1.5 The Governing Body is committed to ensuring that all staff responsible for the intimate care of pupils will undertake their duties in a professional manner at all times. It is acknowledged that these adults are in a position of great trust.
- 1.6 School staff recognise that there is a need to treat all pupils, whatever their age, gender, disability, religion, ethnicity or sexual orientation with respect and dignity when intimate care is given. The child's welfare is of paramount importance and his/her experience of intimate and personal care should be a positive one. It is essential that every pupil is treated as an individual and that care is given gently and sensitively: no pupil should be attended to in a way that causes distress or pain.
- 1.7 Staff work in close partnership with parent/carers and other professionals to share information and provide continuity of care.

- 1.8 Where pupils with complex and/or long term health conditions have a health care plan in place, the plan should, where relevant, take into account the principles and best practice guidance in this intimate care policy.
- 1.9 Members of staff are given the choice as to whether they are prepared to provide intimate care to pupils.
- 1.10 All staff undertaking intimate care are given appropriate training.
- 1.11 This Intimate Care Policy has been developed to safeguard children and staff. It applies to everyone involved in the intimate care of children.

2) Child focused principles of intimate care

The following are the fundamental principles upon which the Policy and Guidelines are based:

- ☐ Every child has the right to be safe.
- ☐ Every child has the right to personal privacy.
- ☐ Every child has the right to be valued as an individual.
- ☐ Every child has the right to be treated with dignity and respect.
- ☐ Every child has the right to be involved and consulted in their own intimate care to the best of their abilities.
- ☐ Every child has the right to express their views on their own intimate care and to have such views taken into account.
- ☐ Every child has the right to have levels of intimate care that are as consistent as possible.

3) Definition

- 3.1 Intimate care can be defined as any care which involves washing, touching or carrying out a procedure to intimate personal areas which most people usually carry out themselves but some pupils are unable to do because of their young age, physical difficulties or other special needs. Examples include care associated with continence and menstrual management as well as more ordinary tasks such as help with washing, toileting or dressing.
- 3.2 It also includes supervision of pupils involved in intimate self-care.

4) Practice at Reedley Primary School

- 4.1 Pupils who require regular assistance with intimate care have written Individual Education Plans (IEP), health care plans or intimate care plans agreed by staff, parents/carers and any other professionals actively involved, such as school nurses or physiotherapists. The plan is agreed at a meeting at which all key staff and the pupil should also be present wherever possible/appropriate. Any historical concerns (such as past abuse) should be taken into account. The plan should be reviewed as necessary, but at least annually, and at any time of change of circumstances, e.g. for residential trips or staff changes (where the staff member concerned is providing intimate care). They should also take into account procedures for educational visits/day trips.

- 4.2 Staff agree with the pupil and parents/carer's appropriate terminology for private parts of the body and functions and this should be noted in the plan.
- 4.3 Where a care plan or IEP is **not** in place, parents/carers are informed the same day if their child has needed help with meeting intimate care needs (eg has had an 'accident' and wet or soiled him/herself). Information on intimate care should be treated as confidential and communicated in person by telephone or by sealed letter.
- 4.4 In relation to record keeping, a record is kept on CPOMS by staff every time a child has an invasive medical procedure, e.g. support with catheter usage (see afore-mentioned multi-agency guidance for the management of long term health conditions for children and young people).
- 4.5 Accurate records are kept when a child requires assistance with intimate care; these can be brief but should, as a minimum, include full date, times and any comments such as changes in the child's behaviour. It should be clear who was present in every case.
- 4.6 These records are available to parents/carers on request.
- 4.7 Pupils are encouraged to act as independently as possible and to undertake as much of their own personal care as is possible and practicable. When assistance is required, this is undertaken by one member of staff, however, they ensure that another appropriate adult is in the vicinity who is aware of the task to be undertaken and that, wherever possible, they are visible and/or audible. Intimate or personal care procedures do not involve more than one member of staff unless the pupil's care plan specifies the reason for this.
- 4.8 Staff who provide intimate care are trained in personal care (eg health and safety training in moving and handling) according to the needs of the pupil. Staff should be fully aware of best practice regarding infection control, including the requirement to wear disposable gloves and aprons where appropriate.
- 4.9 Staff are supported to adapt their practice in relation to the needs of individual pupils taking into account developmental changes such as the onset of puberty and menstruation.
- 4.10 There is careful communication with each pupil who needs help with intimate care in line with their preferred means of communication (verbal, symbolic, etc) to discuss their needs and preferences. Where the pupil is of an appropriate age and level of understanding permission should be sought before starting an intimate procedure.
- 4.11 Staff who provide intimate care speak to the pupil personally by name, explain what they are doing and communicate with all children in a way that reflects their ages.
- 4.12 Every child's right to privacy and modesty will be respected. Careful consideration will be given to each pupil's situation to determine who and how many carers might need to be present when s/he needs help with intimate care. SEN advice suggests that reducing the numbers of staff involved goes some way to preserving the child's privacy and dignity. Wherever possible, the pupil's wishes and feelings are sought and taken into account.

- 4.13 An individual member of staff always informs another appropriate adult when they are going alone to assist a pupil with intimate care, so that another staff member can be in the vicinity.
- 4.14 The religious views, beliefs and cultural values of children and their families are taken into account, particularly as they might affect certain practices or determine the gender of the carer.
- 4.15 Whilst safer working practice is important, such as in relation to staff caring for a pupil of the same gender, there is research which suggests there may be missed opportunities for children and young people due to over anxiety about risk factors; ideally, every pupil should have a choice regarding the member of staff. There might also be occasions when the member of staff has good reason not to work alone with a pupil. It is important that the process is transparent so that all issues stated above can be respected; this can best be achieved through a meeting with all parties, as described above, to agree what actions will be taken, where and by whom.
- 4.16 Adults who assist pupils with intimate care are employees of the school, not students or volunteers, and therefore have the usual range of safer recruitment checks, including enhanced CRB checks.
- 4.17 All staff are aware of the school's confidentiality policy. Sensitive information will be shared only with those who need to know.
- 4.18 Health & Safety guidelines are adhered to regarding waste products, if necessary, advice should be taken from the LCC Procurement Department regarding disposal of large amounts of waste products or any quantity of products that come under the heading of clinical waste.
- 4.19 No member of staff carries a mobile phone, camera or similar device whilst providing intimate care.

5) Child Protection

- 5.1 The Governors and staff Reedley School recognise that pupils with special needs and who are disabled are particularly vulnerable to all types of abuse.
- 5.2 The school's child protection procedures will be adhered to.
- 5.3 From a child protection perspective it is acknowledged that intimate care involves risks for children and adults as it may involve staff touching private parts of a pupil's body. In this school best practice will be promoted and all adults (including those who are involved in intimate care and others in the vicinity) are encouraged to be vigilant at all times, to seek advice where relevant and take account of safer working practice.
- 5.4 Where appropriate, pupils will be taught personal safety skills carefully matched to their level of development and understanding.
- 5.5 If a member of staff has any concerns about physical changes in a pupil's presentation, e.g. unexplained marks, bruises, etc s/he immediately reports

concerns to the Designated Senior Leaders for Child Protection. A clear written record of the concern will be completed and a referral made to Children's Services Social Care if appropriate, in accordance with the school's child protection procedures. Parents/carers will be asked for their consent or informed that a referral is necessary prior to it being made but this should only be done where such discussion and agreement-seeking will not place the child at increased risk of suffering significant harm.

- 5.6 If a pupil becomes unusually distressed or very unhappy about being cared for by a particular member of staff, this should be reported to the class teacher or Headteacher. The matter will be investigated at an appropriate level (usually the Headteacher) and outcomes recorded. Parents/carers will be contacted as soon as possible in order to reach a resolution. Staffing schedules will be altered until the issue/s is/are resolved so that the child's needs remain paramount. Further advice will be taken from outside agencies if necessary.
- 5.7 If a pupil, or any other person, makes an allegation against an adult working at the school this should be reported to the Headteacher (or to the Chair of Governors if the concern is about the Headteacher) who will consult the Local Authority Designated Officer in accordance with the school's policy: Dealing with Allegations of Abuse against Members of Staff and Volunteers. It should not be discussed with any other members of staff or the member of staff the allegation relates to.
- 5.8 Similarly, any adult who has concerns about the conduct of a colleague at the school or about any improper practice will report this to the Headteacher or to the Chair of Governors, in accordance with the child protection procedures and 'whistle-blowing' policy.

6) Physiotherapy

- 6.1 Pupils who require physiotherapy whilst at school should have this carried out by a trained physiotherapist. If it is agreed in the IEP or care plan that a member of the school staff should undertake part of the physiotherapy regime (such as assisting children with exercises), then the required technique must be demonstrated by the physiotherapist personally, written guidance given and updated regularly. The physiotherapist should observe the member of staff applying the technique.
- 6.2 Under no circumstances do school staff devise and carry out their own exercises or physiotherapy programmes.
- 6.3 Any concerns about the regime or any failure in equipment should be reported to the physiotherapist.

7) Medical Procedures

- 7.1 Pupils who are disabled might require assistance with invasive or non-invasive medical procedures such as the administration of rectal medication, managing catheters or colostomy bags. These procedures will be discussed with parents/carers, documented in the health care plan or IEP and will only be carried out by staff who have been trained to do so.
- 7.2 It is particularly important that these staff should follow appropriate infection control guidelines and ensure that any medical items are disposed of correctly.
- 7.3 Any members of staff who administer first aid should be appropriately trained in accordance with LA guidance. If an examination of a child is required in an emergency aid situation it is advisable to have another adult present, with due regard to the child's privacy and dignity.

8) Massage

- 8.1 Massage is now commonly used with pupils who have complex needs and/or medical needs in order to develop sensory awareness, tolerance to touch and as a means of relaxation.
- 8.2 It is recommended that massage undertaken by school staff should be confined to parts of the body such as the hands, feet and face in order to safeguard the interest of both adults and pupils.
- 8.3 Any adult undertaking massage for pupils must be suitably qualified and/or demonstrate an appropriate level of competence. Parents would be informed prior to any such programme commencing with their child.
- 8.4 Care plans include specific information for those supporting children with bespoke medical needs.

9) Considerations which are taken in the event of a lockdown in school or change in normal practice eg COVID -19 pandemic

9.1 Any changes to the care plan are made in writing and without delay, even if the change in arrangements is temporary; e.g. staff shortages, changes to staff rotas during the pandemic, etc.

9.2 Intimate and personal care is carried out by an adult that the child does not know. Anyone undertaking intimate / personal care in an education setting is in regulated activity and has been checked against the relevant DBS barred list, even if the activity only happens once; this includes volunteers. Volunteers and visiting staff from other schools do not undertake care procedures without appropriate training.
